EDUCATION

University of Washington

Seattle, WA

Bachelor of Science in Computer Science

Expected Jun 2028

- **Relevant Coursework:** Linear Algebra, Computer Programming II/III (accelerated), System And Software Tools, Scientific Computing, Hardware/Software Interface, Foundations of Computing I & II, Data Structure and Parallelism, Algorithms, Systems Programming

TECHNICAL SKILLS

Languages: Python, Java, SQL, C, C#, JavaScript, TypeScript, Dart, HTML/CSS, Swift, $\text{\LaTeX}$

Frameworks & Libraries: React, Next.js, Node.js, FastAPI, PySpark, Scikit-learn, pandas, NumPy, vLLM, Flutter

Cloud & Databases: Google Cloud Platform (GCP), AWS (Bedrock, Lambda), Databricks, Supabase, Firestore

Tools & Environments: Git, Docker, Linux, Bash, VS Code, Conda, Unity, ROS 2, Gazebo, Figma, Vercel, Cursor

EXPERIENCE

Undergraduate Research Fellow (Incoming)

Jun 2026 – Aug 2026

Montana State University

Bozeman, MT

- Selected for a competitive, NSF-sponsored Research Experience for Undergraduates (REU) program focused on advanced algorithms and data science applications.

Software Engineer

Mar 2026 – Jun 2026

SkyDrop

Seattle, WA

- Built a task management dashboard with **Next.js** and **Supabase** for a 50-member team to organize the team better and deployed it using **Vercel**.
- Set up a real-time **OpenCV** and **ROS** vision pipeline for autonomous landing, detecting ArUco markers in **Gazebo** and stabilizing coordinate offsets via frame-averaging.

AI + Backend Engineer

Oct 2025 – Jun 2026

Husky Coding Project

Seattle, WA

- Built a real-time deepfake verification for an Android application, achieving only **3-second** inference latency, by deploying the pre-trained FakeVLM vision-language model using **vLLM** on **Google Cloud Platform**.
- Set up a scalable client-server architecture capable of handling concurrent media processing requests, by designing server infrastructure and integrating **Firestore** for secure, flexible metadata storage.

MIT Beaver Works Summer Institute SGAI member

Jul 2024 – Aug 2024

Massachusetts Institute of Technology

Cambridge, MA

- Collaborated in an Agile team of five to implement game components using **Python**, **Unity**, and **Git** during an intensive **8-week** program on systems modeling and AI ethics.
- Achieved a **92% classification accuracy** across 5 CNN models by generating a custom dataset of **2,000+ synthetic images** in Unity to train neural networks.

PROJECTS

EduPath | AWS (Bedrock, DynamoDB, Lambda), Next.js, TypeScript, TailWind CSS

May 2026

- Built a full-stack, AI-powered academic planning assistant utilizing **AWS Bedrock** (Claude 3.5 Sonnet) to generate personalized dynamically adaptive degree roadmaps based on user goals.
- Set up a high-performance backend infrastructure with single-table design in **AWS DynamoDB** and serverless **Lambda** functions.

Weather-Yield Detection Model | PySpark, Databricks, FastAPI

Mar 2026

- Set up a distributed **PySpark** data pipeline on **Databricks** to ingest and merge millions of rows of NOAA weather data and RMA crop yield reports.
- Trained and deployed an **XGBoost** model via **FastAPI**, using **SHAP** values and the **OpenAI Assistants API** for natural language querying of yield anomalies.

CERTIFICATIONS

Cisco Certified Network Associate (CCNA 200-301), Cisco

Jun 2025
